
NBW Ride With GPS

Thanks to the persistence of Alfredo Sosa, NBW Membership Coordinator, we have established a

NBW Ride With GPS account.

To take full advantage of the benefits that this club account brings (calendar of events, NBW ride library, NBW ride maps, and cue sheets) club members must have a personal Ride With GPS (RWGPS) account. Personal RWGPS accounts are free.

For the last few months, several club members have been beta testing the new account and offering feedback for improvements. The new club account went live July 1.

What does the club account give you?

The club account will allow you to do the following:

- Allow members to ride NBW rides at any time using GPS; you do not have to wait for arrows;
- Direct write of Garmin TCX files to the latest Garmin GPS computers (those models less than 5 years old);

Customization of advance distance warning of turns;

The ability to print fantastic cue sheets;

The ability to print out maps, and maps for each turn;

Allows full routing, warnings, and spoken directions for club members using Ride With GPS app (the app is free) on Apple iPhones and Android devices

How do you access the NBW RWGPS?

There are three ways to access the account:

Link to the Ride With GPS club page posted in the NBW *Spoke'n Word*;

Link to the Ride With GPS club page posted on the NBW web site in the members only area;

Link to the Ride With GPS club page posted each week in the weekly email.

What will not change

For the months of July and August, we will continue to publish the links to GPS files on the NBW web site directly. This web page **will be discontinued on September 1.**
