

DON'T BE A ROAD HOG (it's no joke)

The TFCE route is **NOT** closed to traffic.
Do not wander all over the road as if you own it !!

**The basic rules of the road must be followed.
Sharing the road with vehicles means sharing the responsibility of a vehicle.**

Local police have our full support and co-operation and will cite and/or ticket any cyclist(s) riding in a reckless or dangerous manner. This is a ride, **not a race**. Pace lines can be dangerous and are discouraged.

- * Ride to the right, single file, except when overtaking (it's the law).
- * Use hand signals for all turns.
- * When stopping for reasons other than traffic, move off the roadway, making way for those following (cyclists and automobiles alike).
- * When you are aware of vehicles approaching from behind, alert cyclists ahead by calling "car back".
- * When making left turns at a controlled intersection (those having a traffic light or other traffic control), ride close to the right side of the road you are turning into. Use hand signals.
- * When making left turns without traffic controls... when traffic allows, move to right of center, then turn, moving to the right side of the road you are turning into. Use hand signals.
- * When making a right turn, stay right throughout the entire turn. Do not wander left before or after the turn.
